

Aether Mobile Press Release

Aether Mobile slashes roaming charges for business travellers

19th June 2013

Aether Mobile, an MVNO who offers first class mobile/cell service in over 200 countries for voice and SMS, with 3G data services available in 135 countries, have extended their service to business users worldwide.

Many business travellers worldwide rely heavily on their mobile/cell phone to keep in touch with colleagues, customers and suppliers whilst travelling abroad but often avoid using it too often due to fear of bill shock. By switching to Aether Mobile for international travel, mobile users do not have to carry numerous handsets, continuously swap SIM cards, use high cost hotel phones, or the alternative of switching their handset off through fear of high roaming charges. With businesses under pressure to reduce roaming charges whilst abroad, not only does this mean that business is deemed more difficult through a lower rate of contact, but also customers are missing out due to reduced contact.

Aether Mobile not only offers genuine savings of between 50-90% compared to main network operators worldwide, but it also enables subscribers to receive free incoming calls in 80 countries. A full 3G data service is available in 135 countries, slashing roaming charges for business people for all services they need when they travel abroad. The SIM cards work in the majority of unlocked handsets including the latest smartphones.

Aether Mobile provides business travellers with a solution to cover all their roaming needs. Most networks provide their customers with a SIM which offers a single identity, however, Aether Mobile offers multiple identities providing further benefits to their customers. Our new generation SIM card offers two SIMS in one; the standard sized mini SIM, plus the micro SIM which fits most iPhones, iPads and smartphones.

About Aether Mobile

Aether Mobile, launched in 2009, offers a low cost roaming mobile service to personal and business customers worldwide. The service works in over 200 countries worldwide, and has network agreements with over 560 networks, we offer greater coverage than many other Tier 1 Network Operators.
